

Systemic Discrimination: Theory and Measurement

J. Aislinn Bohren, Peter Hull, and Alex Imas

Replication README

The code in this replication package creates all figures and tables in the paper and online appendix. It is divided into three subfolders, `resume_audit_study`, `rec_letter_study`, and `screening_study`, corresponding to the two main applications (in Sections V and VI, respectively) and appendix application. The specific programs producing each exhibit are:

- Table I: `resume_audit_study/systemic.do`
- Table II: `rec_letter_study/systemic.do`
- Figure V: `resume_audit_study/systemic.do` then `resume_audit_study/figure.py`
- Figure VI: `resume_audit_study/systemic.do`
- Figure VII: `rec_letter_study/figureVI.py`
- Figure VII: `rec_letter_study/curlyBrace.py`
- Table A1: `screening_study/lab2.do`
- Table A2: `resume_audit_study/systemic.do`
- Figure A1: `screening_study/lab2.do`

The replication package also includes the following items in the corresponding folders:

Resume_audit_study:

- Code for preparing CVs: `resume_audit_study/CV_preparation.R`
- Code for job scraping: `resume_audit_study/job_scraping.py`
- Notes for callback analysis: `resume_audit_study/Notes_on_callback_analysis.pdf`
- Data files on names in `Data` folder (`all_name_combinations.csv`, `names.csv`, `surnames.csv`).
- Data file on call backs in `Data` folder (`callback.csv`, `callback_time.csv`)
- Data file on job availability in `Data` folder (`jobsavail.csv`)
- Data on hiring manager survey in `Data` folder (`hiringmanagersurvey.csv`)

Rec_letter_study:

- Notes for text analysis: `rec_letter_study/Notes_on_Eperimental_IA.pdf`
- Data file on ratings: `rec_letter_study/recletteroutcomes.csv`

All programs can be run from `main.do` in the root folder. Questions about programs or data can be directed to Alex Imas (alex.imas@chicagobooth.edu).
